

Java Script Assignment: Fall 19

- Write a program which will find out the largest number from three integer numbers, (assume the numbers are in variable a, b and c), The numbers are taken from the users
- Write a program using while loop which print the number like 49, 48, 47, 46.....21,20, 19.
- Write a program which show the even number from 1 to 22
- Write a program which add the numbers from 50 to 96 and show the sum of those numbers
- Write a function to find largest number from the given two numbers and the method will return integer value, Now show the return value of function
- Write a program which finds out grade A-> 80-100, B->70-79, 60-69, F->0-59. Marks is given by user from the keyboard
- Suppose you need to write a program to take a survey of Facebook users.You can use IF ELSE statements to do this.
If a person inputs 1 hour or less then 1 hour in facebook he is a “Normal User”.
If he inputs less than 4 hours then he is “Facebook Lover”.
If he inputs less than 7 hours he is “Engaged with Facebook” and
If he inputs more than 7 hours he is a “Man of Facebook”.
- Stuart is a weak student in the class and he is not able to find out odd and even number. You are the best friend of Stuart and willing to help him. So write a program where Stuart gives a number as an input and your program will display either the number is odd or even.

Input:	Output:
5	Your Number 5 is Odd
12	Your Number 12 is Even
- Wrote a function Sum() which takes two number (floating type) and sum of those two number also return the sum. Now call the Sum() and show the return value of Sum();
- Write a program and define three function Add (), Show() and Coupon(). Add function takes three parameter and return the sum of that parameter. Show function display your name and Coupon function takes a parameter as a character and display the character. Now call all of the function from the main function. [suppose Add() function parameters are 3 , 5 ,9]

10. Write a program which print the following diagram (Must to using loop, you can print more than one #, between two # there is 3 space)

#

#

#

#

11. Write a program which take two number from the and show the largest numbers

- 12 Write a program which take three number from the user and display their sum.
